

## Aerial Work Platform

Aerial Work Platforms - There are lots of attachments used for lift trucks that could be used so as to help expand the capabilities of your forklift and allow you to pick up items, handle materials with out difficulty or to complete clean-up jobs.

Lots of the attachments are particularly designed to fit on the forks themselves. Fork extensions for instance, are used if you require a lot more blade length, which increases lifting capability. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular accessories are another type used when transferring rolled material in order to ensure it does not roll off of the traditional flat blades.

Examples of lifting accessories consist of pivoting and telescoping boom or crane accessories. They can come in a number of different styles and are most often meant for moving lumber, poles, metal bars and different sort of bulky items. Additional accessories such as other kinds of hooks and hook plates are obtainable in order to lift stuff with a chain or sling. Slab filters and magnetic filters are other stuff that could be utilized along with hook attachments. Slab lifters are specialized attachments that are used for carrying various materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your forklift to be able to make transporting rolls of carpet a lot easier. The attachment hooks onto the lift truck's blades and has a pole which goes through the center of the carpet roll.

There are numerous other kinds of lift truck accessories which could be intended for facility maintenance such as snow forks. These blades connect to front end loaders and could transfer materials like dirt, soil and snow. Other popular cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the forklift blades hook onto for sweeping large spaces such as warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up easy and fast.

A material spreader is one more lift truck accessory that is usually used at facilities. These spreaders are handy for a variety of applications like spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting accessory are work platforms. These could be utilized by numerous various companies daily. Platforms may vary in size from 36" x 36" to up to 60" x 60". Some units may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform units have additional space for personnel in order to carry tools and other essential things meant for the task. Usually work platforms are made of poly material or steel.
